

## EP-LU30102 Electrocardiograph LUMED® EUROECG 601

## **Description**

€URO€CG 601 is a high resolution digital electrocardiograph for adult and pediatric patients. It acquires the 12 leads in isochronous mode and prints on 110mm paper, in various formats. €URO€CG 601 shows the acquired signal also on its color LCD display, in real time or as a review of an exam already acquired and stored. It is equipped with internal memory and additional memory on a removable card. €URO€CG 601 also features automatic interpretation and ECG parameters calculation.

## The main features of EUROECG 601 are:

- Colour graphic TFT LCD display, foldable
- Powered by mains or internal battery (included)
- Automatic ECG Measurement and Interpretation
- Automatic Screening Mode
- Storage up to 1.000 ECGs in several formats: DICOM, PDF, SCP, FDA-XML, XML, JPG, BMP
- Bi-directional DICOM® interface
- HL7 interface
- High-resolution signal
- Detection and processing of Pacemaker's spikes
- Use of external devices, like as USB keyboard, PCL-6 printer or Bar-code reader
- Direct connection to the PC network
- Carrying handle
- PC Software (optional)

All brands and trademarks are propriety of the respective owners.

| Technical Data                            |  |
|---|--|
| LANGUAGE                                  | Italian, English, Spanish, French, Portuguese, Romanian, German, Polish.   |
| ACQUISITION                               | Simultaneous acquisition of 12 leads   |
| DERIVATIONS                               | 12 Standard, Cabrera, Frank, Right Chest leads, Posterior Chest leads, custom  |
| OPERATING MODES                           | <ul> <li>Automatic (real-time or pre-sample)</li> <li>Manual</li> <li>Rhythm</li> <li>Programmed</li> <li>Trigger</li> <li>Screening</li> <li>Preview screen</li> <li>Freeze &amp; Review</li> </ul> |
| A / D CONVERSION                          | 12 bit   |
| INPUT CURRENT                             | < 0.01 pA  |
| NOISE LEVEL                               | <15 μV   |
| DYNAMIC RANGE                             | ±400 mV  |
| INPUT IMPEDANCE                           | > 50 MQ 10Hz   |
| INPUT VOLTAGE                             | for each channel not less than ± 7.5 mV  |
| ENTRANCE                                  | Floating, protected against defibrillation discharges  |
| CMRR                                      | >100 dB no filters AC and >120 dB with AC filter   |
| FREQUENCY RESPONSE                        | 0.05Hz - 150 Hz  |
| TIME CONSTANT                             | > 5 s  |
| SPEED                                     | 5, 6.25, 10, 12.5, 25 and 50 mm/s ±2%  |
| HEART RATE                                | 30 - 300 bpm  Precision: the greater between ± 1 bpm or ±1 % of the value  |
| GAIN, SENSITIVITY                         | 1.25, 2.5, 5, 10, 20 and 40 mm/mV tolerance ±2% Automatic gain (limbs / chest) 10/5 or 20/10 mm/mV Automatic Calibration 1 mV ±2%  |
| SAMPLING RATE                             | Acquisition: 2.000 samples/channel/sec Storage and processing: 1.000 samples/channel/sec   |
| PACEMAKER DETECTION                       | Amplitude: ±2mV ~ ±700mV, Duration: 0.1 ms ~ 2.0 ms  Detection sensibility is user selectable  |
| QUANTIZATION                              | 4.563 uV/LSB   |
| ECG GRID                                  | Available in ECG displays  |
| DISPLAY COLORS                            | At least three color schemes   |
| FREEZE AND PLAYBACK                       | Up to 300 secs of ECG  |
| AUTOMATIC<br>ACQUISITION OF 10<br>SECONDS | Pre-sample Real Time Trigger Periodic  |
| DATA MODE                                 | ECG, Demo, Calibration   |

|   | Thermal printer, for 110 mm Roll thermal paper  |
|---|---|
| INTERNAL PRINTER                          | Vertical resolution >= 8 dots/mm  |
|   | Horizontal resolution >= 40 dots/mm (25 mm/s) >= 20 dots/mm (50 mm/s)   |
| PRINT FORMATS (BUILT-IN THERMAL PRINTER)  | <ul> <li>Automatic: 6x2+1R, 6x2, 3x4+3R, 3x4+1R, 3x4 (duration 10 secs, rythm leads are selectable)</li> <li>Manual: 1, 2, 3, 6 channels</li> <li>Rythm: 1 or 3 selectable leads, duration 60 secs</li> <li>Periodic: like as Automatic, printout frequency 1 to 60 min, duration 1 to 60 min</li> <li>Trigger: like as Automatic, the printout occours only in case of an event (arrythmia etc.)</li> <li>Screening: like as Automatic, but with short ECG evaluation</li> </ul> |
| EXTERANL PRINTER                          | Type: USB PCL-6 native  |
| (OPTIONAL)                                | Layout: 12x1, 6x2+1R, 6x2, 3x4+3R, 3x4+1R, 3x4  |
| FILTERS                                   | <ul> <li>EMG (muscolar tremors): 20, 25, 30, 35, 40, 45 Hz</li> <li>Mains Interferences: 50 or 60Hz</li> <li>Baseline correction (high-pass) 0.05, 0.15, 0.25, 0.32, 0.5, 0.67 Hz</li> <li>Artefacts (low-pass): 75, 100, 150 Hz</li> </ul>   |
| DISPLAY                                   | <ul> <li>Size and resolution: 7", 800×480 pixel, 152x85 mm;</li> <li>Type: TFT LCD graphic colour</li> <li>Ergonomy: tilting 0°-90°</li> <li>Available data: 1 to 12 ECG waveforms, patient data, date\time, operating mode, battery status, Heart-Rate, ECG parameters (filters, speed, amplitude etc), contact (each and every electrode or lead), paper status, memory status</li> <li>Layout: 12x1, 6x2+1R, 6x2, 3x4+3R, 3x4+1R, 3x4</li> </ul>                               |
| ERGONOMY AND<br>USER INTERFACE            | <ul> <li>Intuitive and clear Graphic Interface, User Friendly layout and commands</li> <li>Foldable &amp; tiltable Display 0°-90°</li> <li>Built-in carrying handle</li> <li>Extended alphanumeric keybord</li> <li>Solid Brass screw dies, to fix the devcie on shelves trolleys etc.</li> </ul>   |
| ECG LAYOUT                                | 12x1, 6x2+1R, 6x2, 3x4+3R, 3x4+1R, 3x4, 3R, 1R  |
| ECG DISPLAY MODE                          | Simultaneous or Sequential  |
| ALGORYTHMS FOR 10<br>SECS. ECG PROCESSING | <ul> <li>ECG interpretation</li> <li>ECG classification</li> <li>ECG global measurements (Heart Rate, PR interval, QRS duration, QT/QTc, R/QRS/T electric axis, RV5/SV1 amplitude)</li> <li>ECG lead-by-lead measurements (QRS type, duration [PR, QRS, QT], duration and amplitude [P, Q, R, R', S, S'], amplitude [P', T, T', STJ, ST40, ST60 and ST80)</li> <li>Signal Averaging for the 12 leads</li> </ul>   |
| KEYBOARD                                  | Alphanumeric, with function keys and dedicated keys for fast operations   |
| INTERFACE                                 | Ethernet Board RJ45, USB-A Master, USB-B Slave, SD card<br>WiFi is optional   |
| ALARMS & SIGNALS                          | Alarms: No paper, electrode and skin contact quality, battery charge status   |
| SELF DIAGNOSYS                            | Autotest for display, keyboard, memory, battery, ECG acquisition, Ethernet board, thermal printer, log.   |

| FCC CODY                      | Convertible lest FCC recorded in Automotive media   |
|-------------------------------|---|
| ECG COPY                      | Copy of the last ECG, recorded in Automatic mode.   |
| ECG STORAGE                   | Up to 1.000 ECGs in digital format. Files include patient data, ECG leads etc. List of the archive content.           |
| ECG FORMAT                    | DICOM, PDF, FDA-XML, euro_ecg XML, SCP, BKG, JPG, BMP   |
| DICOM®                        | 12-Leads ECG Storage, General Waveform ECG Storage, Encapsulated PDF Storage Modality Worklist                        |
| DATA EXCHANGE & COMMUNICATION | - DICOM Modality Worklist<br>- HL7  |
|                               | - delivery File System over FTP   |
|                               | - Computers can acceed to the storage, as a generic USB volume.   |
| REPOSITORY<br>MANAGEMENT      | Operators can add or modify personal data. The system allows you to manage exams: delete,                             |
|                               | transmit, preview, export, search, print, etc.  |
| USB PERIPHERALS<br>(OPTIONAL) | Barcode scanner, PCL-6 printer, keyboard (all these parts are optional)   |
| POWER & AUTONOMY              | AC: 100~240 V, 50/60Hz, 0.17A - 0.4A with Medical Grade adaptor.  |
|                               | DC: internal Li-IO rechargeable battery, autonomy >= 2 of continuos print , >= 700 ECGs                               |
|                               | recorder in Automatic mode or >= 7 hours without printing   |
| SIZE & WEIGHT                 | 310x244x65 mm, approx. 2,5 kg battery included  |
| ENVIRONMENT                   | Transport & Storage: Temperature -20°C ~ +55°C, Relative Humidity < 93%, Atmospheric                                  |
|                               | Pressure 50-106 kPa   |
|                               | Use: Temperature +5°C ~ +55°C, Relative Humidity < 80%, Atmospheric Pressure 86-106 kPa                               |
| PROTECTION GRADE              | IP XO   |
| SAFETY                        | IEC Class I Type CF   |
| STANDARD ACCESSORIES          | 4mm Banana IEC patient cable, reusable chest and limbs electrodes, gel ECG spray, thermal                             |
|                               | paper (roll and Z-fold), Schuko power cord (others available on request), internal rechargeable battery, User Manual. |
|                               |   |
