

BMSY014 - THERMAL PAPER FOR SONY VIDEOPRINTERS

Description

LUMED SRL offers a new model of high-quality compatible film for Sony videoprinters (**UPP110-HG**). Thanks to the optimal grey-scale response, our product solved the major problem of the other compatible films, because it can catch all the clinical information, like as the original does.

End-users of BMSY014 also benefit from relevant saving, due to the lower price and the high quality of our film.

Each roll is packed individually, with Aluminum foil. Each box contains 25 rolls.
