

"EUROCATCH" ECG Suction Electrodes

DESCRIPTION

LUMED "EUROCATCH" Reusable Precordial ECG Suction Chest Electrodes have features that make them reliable during signal recording with all ECG devices available on the market. The metallic part is silver and silver chloride (ag/agCl) in order to allow a safe and clear signal transmission.

LUMED reusable precordial ECG suction chest electrodes, thanks to screw and clip connections, can be used with all ECG devices and monitors with patient cable that has banana pin (4mm) or snap. The product is latex and nickel free. They are available in set of 6 suction electrodes, as showed in the picture, and in the following versions: adult (EL0002) and paediatric (EL0001).
